A brief focus on Georgia's agricultural industry

The University of Georgia Center for Agribusiness and Economic Development

# **2018** Ag Snapshots

A brief focus on Georgia's agricultural industry

Agriculture has long shaped Georgia's history, a driving force for local economies across the state. The 2018 Ag Snapshots brief on Georgia's agricultural economy is based on the 2016 Farm Gate Value Report, an annual, county-level economic valuation for all food and fiber production in the state. Together these commodities directly represent a value of over \$13.75 billion to the Georgia economy.

Beyond their farm gate values, these commodities form a foundation for our diverse agricultural supply chain, providing key resources to many sectors and adding value within the economy. Ag Snapshots provides the output and jobs supported by food and fiber production, which include the directly related industries along the supply chain - the total economic contribution - to highlight the importance of the agricultural economy to Georgia. In 2016, food and fiber production and related industries represented \$73.3 billion in output to Georgia's \$972 billion economy and more than 383,600 jobs in the economy.

Visit caed.uga.edu for more resources and to access this report online.
