2019 Ag Snapshots

A brief focus on Georgia's agricultural industry

Author: Sharon P. Kane, Senior Public Service Associate, Economist Center for Agribusiness and Economic Development College of Agricultural and Environmental Sciences

Agriculture, a driving force for local economies across Georgia, has long shaped the state's history. The 2019 Ag Snapshots brief on Georgia's agricultural economy is based on the 2017 Georgia Farm Gate Value Report, an annual, county-level economic valuation for all food and fiber production in the state. Together these commodities directly represent a value of over \$13.75 billion to the Georgia economy.

Beyond their farm gate values, these commodities form a foundation for our diverse agricultural supply chain, providing key resources to many sectors and adding value within the economy. Ag Snapshots provides the output and jobs supported by food and fiber production, which include the directly related industries along the supply chain — the total economic contribution — to highlight the importance of the agricultural economy to Georgia. In 2017, food and fiber production and related industries represented \$73.7 billion in output to Georgia's \$1 trillion economy and more than 392,400 jobs in the economy.
